BROWN KEEPS YOU ON TRACK.

RAIL / EQUIPMENT

When the job demands a vehicle as tough as it is precise and as durable as it is nimble, rail-ready Brown-built trucks can get you there.

Durable materials, innovative design and an attention to detail: not only does Brown build it,

Brown builds it better

Track Inspector

Material Handler

Custom Rail Trucks

RAIL EQUIPMENT

BROWN KEEPS YOU ON TRACK.

Track Inspector

Whether you're driving to the tracks or riding down them, Brown's Track Inspector is built to tackle the most demanding jobs, day in and day out. You pick the chassis, and our engineers will fit it with Hy-Rail gear to FRA regulations.

HD Track Inspector

Brown engineers build the body of each HD Track Inspector over a larger chassis to stand up to the most difficult conditions. Throw in optional oxygen/acetylene equipment and hose reels, custom-built side tool boxes, and Brown's 65 years of building hardworking, custom vehicles, and you've got the most reliable truck on wheels, rubber, steel or otherwise.

Material Handler

With crane lift capacities from 4,500 lbs to 16,000 lbs and boom lengths ranging from 22 to 30 feet, the Material Handler has the capacity to lift the heaviest loads and deliver those loads where you need them with the precision you require.

Add on a Brown HD custom bed with available rail racks, magnet wells, high tensile steel floors, and your choice of wood, steel, or flip-down side boards, and you've got the best grapple truck on roads or rails.

Custom Rail Trucks

From Rail Testing Trucks to Welding Trucks to just about anything you can imagine, Brown can build it.

not only does Brown build it,
Brown builds it better
