

Power Treator™ 12 Volt Spray System

Advantages

- More efficient applications for both lubricants and anti-icing materials
- Faster reaction time when weather turns
- Designed for use in high railers or yard utility vehicles
- Dual use pump designed for spraying switches and filling of reservoir
- Specifically designed for higher viscosity fluids

Technical Information

- 30-gallon reservoir
- 12 volt DC power heavy-duty reversible pump designed for higher viscosity fluids
- 31" W x 43" L x 24" H
- 130 lbs. net weight
- 440 lbs. gross weight
- 75' x 3/8" HD 300 psi self-retracting discharge hose
- Manifold and suction assembly to use Power Treator HP pump to fill reservoir from 55-gallon drum or totes
- Reversible pump to purge reservoir tank and spray hose back into drum/tote when finished
- Bypass assembly and pressure relief for continuous operation while treating switches
